Custom Configurations

You choose your favorite laptop.
You choose your favorite distribution.
You customize your selections with accessories, partitioning, dual boot, and more.
Let EmperorLinux do the rest.

Linux Pre-Installed

Full Linux hardware support right out of the box, including: X-server, PCMCIA, CD/DVD, sound, ethernet, wireless, USB, FireWire, modem, power management, and more. We tie it all together with our custom kernel.

Technical Support

To: support@emperorlinux.com
From: customer@hombase.net
Subject: Configuration of 802

Just bought a new wireless hub at home and wanted to learn how to configure it to be a wireless hub for my PC and my laptop so that I can have wireless anywhere in my house.

And I still have my office

EmperorLinux laptops come with one year of Linux technical support via toll free phone and email. All systems come with one to three years hardware warranty provided by the manufacturer.

What does EmperorLinux do?

EmperorLinux specializes in the installation and configuration of the Linux operating system on laptop and notebook computers. EmperorLinux has been in business since 1999, and we are focused completely on our core portable Linux offerings.

Our goal is to provide an out-of-the-box experience with Linux laptops comparable to that found with commercial operating systems. We start with laptops produced by tier one manufacturers like Dell, Lenovo, Panasonic, Fujitsu, and Sony. Beginning with the Linux distribution of the customer's choice, EmperorLinux adds packages, configuration files, and a custom-compiled kernel to produce the most stable, most fully-featured Linux support for our laptops. Our configuration brings Linux support to all the laptops' features.

EmperorLinux backs up that installation and configuration with one year of Linux technical support by phone and email. We walk our customers through problems like wireless set-up and software installation. We provide kernel updates as they become available to enhance the features of their systems. The laptops' hardware is protected by the original equipment manufacturer's warranty.

EmperorLinux is committed to providing the best possible Linux support on all of the systems we sell. We are also committed to giving back to the Linux community. Our ability to test distributions and kernels on a wide variety of laptops allows us to generate valuable feedback as new kernels and packages are released. Many of our past and present employees have been enthusiastic open source developers. We're willing to talk Linux and laptops with anyone.

EmperorLinux is where the laptop you want, the distribution you love, and our dedicated support converge into an out-of-the-box portable Linux experience.

Contact EmperorLinux

EmperorLinux, located just outside of Atlanta, Georgia, has been providing quality pre-configured Linux laptop solutions to the world since 1999. Our goal is to allow our customers to have their favorite operating system installed on their favorite laptop without hassle or worry about whether or not it will work or how long installation will take.

If you would like to order a pre-configured Linux laptop from EmperorLinux, please look at the (up-to-date) information on our web site:
